

Academic Preparation Begins With

COMPUTERTOTS COMPUTER EXPLORERS

Register now for classes at the F.M. Kirby Children's Center

- Hands-on classes 30-minutes once a week, for children 2 ¾ years and older. Low 4:1 student/teacher ratio!
- 3-Year Curriculum. All new software, projects and skills for returning students!
- Classes designed for beginners to advanced computer users!
- Classes use technology to reinforce readiness skills in math, reading and other core subject areas!
- Comprehensive weekly & monthly emails that inform parents and involve them by providing activities and suggestions that link the learning home!
- New educator-designed curriculums each year. Two new pieces of software each month. Projects will be done with printouts sent home!
- Technology activities specially designed to meet the evolving developmental needs of a 2 ¾, 3, 4, and 5-year-old child!
- Interaction with other students in a small, team environment!
- Microwords introduced each month to build your child's computer vocabulary!

A Preview of What Students Will Be Doing in the Next 16-Week Session. Classes Start on February 2nd, 2010!

Kids Keyboarding- Get ready for Finger Fun as children take their first steps to using a keyboard with 10 fingers. They will be exposed to & have reinforced letter, alphabet and number recognition, understand the concept of top, middle and bottom rows & corresponding keys, familiarization with the home row & the digital dexterity of two handed keyboarding!

Digital Microscopes- Children will become little scientists as they peer through a digital microscope looking at objects up close. Slides will be made, pictures are captured, and slide shows created!

Classes held on Tuesdays at The F.M. Kirby Children's Center
